

the DRMO at Roosevelt Roads Naval Base. Expired pharmaceuticals are sent to an expired pharmaceuticals vendor for credit.

- **Training Support Center (TSC) (Bldg 607)** - The Training Support Center provides visual information and training support products and services. The TSC produces a wide variety of instructional aids, illustrations, charts, computer graphics, and so on. The photography section of the TSC now utilizes digital photography, eliminating the waste streams associated with "wet" photography processing. The TSC also issues, receives, distributes and maintains MILES equipment. The only waste stream associated with the MILES equipment would be waste batteries, however, the individual units using the equipment are responsible for providing and disposing of the batteries.
- **USPFO-PR Warehouse (Bldg 541)** - Maintains a separate EPA ID number as a conditionally exempt small quantity generator. Units serviced by the warehouse generate such wastes as asbestos brake pads, batteries, soil contaminated with diesel oil (spill), and expired epinephrine.
- **Veterinary Clinic (Bldg 676)** - Provides vaccinations to pets belonging to all active and retired military personnel. Waste streams include regulated medical waste (sharps), used x-ray fixer, and used x-ray films. Approximately 2 gallons of used fixer are generated per three-month period. This clinic also generates euthanized animals and disposes them as solid waste.

### 3.4 TENANT GENERATORS

Five tenant activities maintain separate EPA ID#s. They are listed in Table 3.1. All other tenants are included under the Fort Buchanan ID#.

Table 3-1

Fort Buchanan Hazardous Waste Generator EPA ID Numbers		
Generator Name	EPA Generator ID Number	Generator Classification
✓ DPW	PR1210099999	SQG
ACSS Services Division	PR4910261169	CEQG
ACSS Elementary School	PR8910290008	CEQG
ACSS High School	PR910261170	CEQG
USAR	PRD987372414	SQG
PRNG - USPFO	PR8211843125	SQG
